DOCKER WORKBOOK – 1

RUNNING DOCKER CONTAINERS

- Run hello-world docker container and observe the container status
- Check the docker images and also write down the size of hello-world image
- Run the nginx container with name as nginx1 and expose it on 8080 port on docker host
- Explain docker container lifecycle
- Explain what happens when you run the docker container
- Show all the states of docker container on nginx based container
- Explain docker architecture
